

MSIED KIT – Product Brief

MSIED kit is a unique and innovative kit designed for children with special needs suffering from Cerebral Palsy, Autism, Down syndrome and other such mental disabilities and special needs.

The solutions in the kit help to develop their body reflexes, hand eye coordination, sensorial development and improve their cognitive and mental response alertness and awareness.

This kit has textured products and is specially designed to suit mentally handicapped children also with tactile perception and sensory stimulation. It helps to improve their blood circulation, balance coordination, posture, and fine movement improvements too. The materials used in developing these kits are absolutely safe and non-toxic.

Picture	Description	Clinical Condition	Advantages
 <p>Infinity Loop</p>	<p>Infinity Loop is a great tool for developmental pediatrics therapy as it facilitates the body reflexes along with eye hand coordination. It also trains a child how to shift his center of gravity (COG) in a controlled manner within the base of support (BOS) to gain good postural stability which helps in improving trunk balance and so reduced incidence of falls.</p>	<p>Special children, Autism, Down Syndrome, Cerebral Palsy, for Physiotherapy</p>	<p>It helps to improve concentration, cognitive skills, good posture and sensorial development of the child.</p>
 <p>Stepping Stones</p>	<p>These stepping stones have anti-slip guard and are ideal to help children train for balance and strength.</p>	<p>Special children, Autism, Down Syndrome, Cerebral Palsy, for Physiotherapy</p>	<p>It helps to improve balance, posture, strength and sensorial development of the child.</p>

	<p>An ideal solution for blood circulation and tactile development, An ideal solution for blood circulation and tactile development.</p>	<p>Special children, Autism, Down Syndrome, Cerebral Palsy, for Physiotherapy</p>	<p>It helps to improve sensorial development, tactile and simulation of the child.</p>
	<p>This textured product is ideal for improving their grip, children's finger dexterity and stabilizes emotions. It helps children to learn how to grip faster, use their fingers more nimbly and how to pinch and release.</p>	<p>Special children, Autism, Down Syndrome, Cerebral Palsy, for Physiotherapy</p>	<p>It helps to improve grip, tactile, simulation and sensorial development of the child.</p>
	<p>Ideal for tactile and sensory stimulation. Strengthens the wrist and hands, and also improve flexibility of the wrist joints.</p>	<p>Special children, Autism, Down Syndrome, Cerebral Palsy, for Physiotherapy</p>	<p>It helps to stimulates movement, circulation in the hands and in the finger tips and improve sensory development of the child</p>
	<p>An ideal solution to strengthen lower body muscle and train for balance. One side is bump studded and the other side is more gently textured to provide different sensory perception to the children. It enhances their touch and coordination skills and posture.</p>	<p>Special children, Autism, Down Syndrome, Cerebral Palsy, for Physiotherapy</p>	<p>It helps to improve posture and sensory development of the child</p>
